

Project area – EIS technical studies

Technical studies carried out for the Australia Pacific LNG Project to support the Environmental Impact Statement (EIS), examined a broad study area. The study area was defined according to the geographic areas that could potentially be impacted by the Project.

The study area will be further defined in the Project Development Plan during the detailed design phase of the Project. The resulting Project area will be smaller.

origin

APLNG is a CSG to LNG Joint Venture between Origin and ConocoPhillips
